SUBJECT INDEX

acétone
origine et structure d'ions $C_4H_9O^+$ issus de la méthylation de l'— par l'iodeméthane ionisé 33
Al^+
Fourier transform mass spectrometric studies of —, Ga^+ and In^+ with organic neutral molecules and alkyl halides 163
alcohols
SIMS spectra of — and the phase explosion model of desorption ionization 221
alkali-containing molecular ions
— in organic SIMS: factors influencing the emission yields 273
alkali organbis(benzene-1,2-diolato) silicates
FAB mass spectra of — 259
alkane eliminations
non-specific hydrogen abstractions in — from ionized ketones. Further evidence that — are ion–neutral complex-mediated 101
alkyl halides
Fourier transform mass spectrometric studies of Al^+, Ga^+ and In^+ with organic neutral molecules and — 163
alkyl nitrites
competition between photodissociation and photoionization in — 319

boron carbide
cluster ions in the laser mass spectra of — 287
bromobutane
the dissociation energies and mechanism of energy-selected — and iodo-butanes 299
butadiene
unimolecular and collision-induced processes of ethyne and ethyne-d_1 dications and charge separation of dications derived from — 177

$C_{10}^{+\cdot}$ and $C_7^{+\cdot}$ carbon cluster ions
— from overcrowded octachloropentafulvalene and octachloronaphthalene 193
$C_4H_9O^+$
origine et structure d'ions — issus de la méthylation de l'acétone par l'iodométhane ionisé 33

cluster ions
abundance distribution of positively and negatively charged — in the laser-induced plasma of a WO_3/C target 47
$CS_2^{+\cdot}$
dissociation of excited — product ions in CS_2^{2+}/rare gas charge-transfer reactions 151
CS_2^{2+}/rare gas charge-transfer reactions
dissociation of excited $CS_2^{+\cdot}$ product ions in — 151
cubic ICR cell
excitation of the z-motion of ions in a — 17

desorption ionization
SIMS spectra of alcohols and the phase explosion model of — 221

electron multiplier
a method for measuring the gain of an — 111
ethyne and ethyne-d_1 dications
unimolecular and collision-induced processes of — and charge separation of dications derived from butadiene 177

Ga^+
Fourier transform mass spectrometric studies of Al^+, — and In^+ with organic neutral molecules and alkyl halides 163

high-Rydberg fragments
kinetic energy spectra of — from keV collisions between small ions and inert gas atoms 81
hydrogen abstractions
non-specific — in alkane eliminations from ionized ketones. Further evidence that alkane eliminations are ion-neutral complex-mediated 101

In^+
Fourier transform mass spectrometric studies of Al^+, Ga^+ and — with organic neutral molecules and alkyl halides 163

inert gas atoms
kinetic energy spectra of high-Rydberg fragments from keV collisions between small ions and — 81
iodobutane
the dissociation energies and mechanism of energy-selected bromo- and — 299
iodométhane ionisé
origine et structure d'ions $C_4H_9O^+$ issus de la méthylation de l'acétone par l'— 33
ionized ketones
non-specific hydrogen abstractions in alkane eliminations from —. Further evidence that alkane eliminations are ion–neutral complex-mediated 101
ion-trapping technique
— for ion/molecule reaction studies in the center quadrupole of a triple quadrupole mass spectrometer 1

ketones
non-specific hydrogen abstractions in alkane eliminations from ionized —. Further evidence that alkane eliminations are ion–neutral complex-mediated 101

metastable peaks
determination of translational energy release distributions through analysis of — 239
methylamine anion
dissociation of the — formed in a single electronic state to give products on two electronic-state surfaces 207

N_2
kinetic energy release from — induced by selective inner-shell excitation 61
NeC^{2+}
a possible explanation why doubly charged NeN^{2+}, but no — and NeO^{2+} were observed in charge-stripping mass spectrometry 335
NeN^{2+}
a possible explanation why doubly charged —, but no NeC^{2+} and NeO^{2+} were observed in charge-stripping mass spectrometry 335
NeO^{2+}
a possible explanation why doubly charged NeN^{2+}, but no NeC^{2+} and — were observed in charge-stripping mass spectrometry 335

octachloronaphthalene
$C_{10}^{+\cdot}$ and $C_7^{+\cdot}$ carbon cluster ions from overclowded octachloropentafulvalene and — 193
octachloropentafulvalene
$C_{10}^{+\cdot}$ and $C_7^{+\cdot}$ carbon cluster ions from overcrowded — and octachloronaphthalene 193
organic neutral molecules
Fourier transform mass spectrometric studies Al^+, Ga^+ and In^+ with — and alkyl halides 163

phase explosion model of desorption ionization
SIMS spectra of alcohols and the — 221
polyatomic ions
reactive collisions of — at solid surfaces 131

reactive collisions
— of polyatomic ions at solid surfaces 131

small ions
kinetic energy spectra of high-Rydberg fragments from keV collisions between — and inert gas atoms 81
sodium acetate
field desorption of – studied by combined optical microscopy and mass spectrometry 55
solid surfaces
reactive collisions of polyatomic ions at — 131

translational energy release distributions
determination of — through analysis of metastable peaks 239
triple quadrupole mass spectrometer
ion-trapping technique for ion/molecule reaction studies in the center quadrupole of a — 1

WO_3/C target
abundance distribution of positively and negatively charged cluster ions in the laser-induced plasma of a – 47

$YBa_2Cu_3O_{7-x}$ superconductors
laser ionization mass spectrometry of — R1

z-motion of ions
excitation of the — in a cubic ICR cell 17
